

RoomWizard Analytics Console1.1.

Sept 11, 2012

Overview

This document describes updates for Steelcase's new RoomWizard Analytics Console for the RW10 and RW20.

What's in 1.1?

The RoomWizard Analytics Console makes it easier track your room usage and trends remotely, without having to harvest data directly from your RoomWizards.

Feature	Description
Load usage data directly from RoomWizards	The RoomWizard Analytics Console can harvest usage information directly from your RoomWizards.
Load usage data from CSV files	The Analytics tool can open CSV files to display usage data, allowing you to share data with other users.
New report views	There are 5 key reports: <ul style="list-style-type: none">• Daily Utilization• Utilization Over Date• Meeting Length Over Date• No-Show Meetings• Attendees
Export Charts	You can export your charts to include in your presentations.
Create custom groups	Create custom groups to analyze desired sets of RoomWizards.
