

Airtouch
collaborative height-adjustable tables

details®

Height-adjustability for anyone. Anywhere. Countless studies show that people are healthier and more productive when they can change postures in their workspaces. The innovative Airtouch® mechanism gives workers the ability to effortlessly, quickly and quietly adjust worksurface height—without the need for electricity—while encouraging frequent workstyle transitions.

3X

“Simply by standing, you burn three times as many calories as you do sitting.”
Dr. James Levine, M.D., Ph.D.

Collaborative height-adjustability. Changing postures on a regular basis provides enormous benefits, including improved focus and energy, while promoting collaboration and engagement. Airtouch can be used seated one minute, then raised to create a standing meeting place or to simply change posture the next.

FLEXIBILITY FOR EMPLOYERS AND EMPLOYEES

Whether in a freestanding or panel-based work environment, for personal use or as a shared worksurface for mobile workers, Airtouch provides employees and employers with options that maximize both productivity and real estate.

Airtouch can be adjusted single-handedly to any height, easily going from seated to standing and back again, without electricity. Simply set the weight load gauge, then use the adjustment paddle to raise and lower the worksurface.

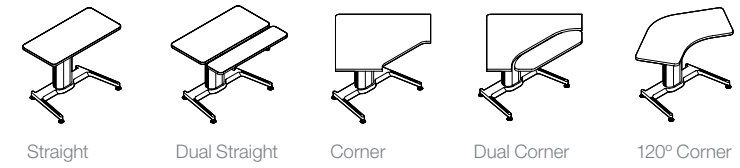

APPLICATION OPTIONS

Airtouch, shown with Answer, with its simple and attractive lines, works well in any workspace and can be personalized with a variety of products.

STATEMENT OF LINE

HEIGHT-ADJUSTABLE TABLES

SPECIFICATIONS

Height range: 26"– 43" with infinite increments
