

# COLLABORATION. UNDERSTANDING THE COMPONENTS.

media:scape is an easy-to-deploy, globally available system that provides a consistent standard for the user, the installer and the IT support team.

**1. PUCK™**  
enables individuals to send information from their laptop (or similar device) to monitors or projectors that are visible to other meeting participants.

**2. AUDIO CABLE**  
allows users to share presentations that include sound.

**3. DIGITAL MATRIX SWITCHER**  
directs multiple signals to and from multiple devices.

**4. MEDIA:SCAPE HDMI**  
connects the matrix switcher and scaler.

**5. SCALER**  
concealed behind the monitor, ensures a consistent image resolution to the display.

**6. MONITORS**  
attach to a media:scape totem.
