

The Steelcase logo is positioned in the upper right corner of the image. It consists of the word "Steelcase" in a clean, white, sans-serif font, with a registered trademark symbol (®) to its upper right. The background of the entire image is a dark, almost black, surface with a subtle, fine-grained texture. In the upper left, a portion of a silver laptop is visible, with a yellow folder and an orange folder resting on top of it. The lower portion of the image shows a close-up of a white, curved chair armrest and a vertical leg, both with a smooth, matte finish. The lighting is soft and directional, highlighting the curves and textures of the chair and the objects on the desk.

NAVI TEAMISLAND

“  
**I believe work is a social endeavour, that collaboration requires continuous effort, and that truly effective workplaces are those that remove barriers that come in the way of interaction and teamwork.**  
”

**HYUN YOO**  
Principal Designer, Steelcase Inc

“  
**We are not just designing furniture here – we are creating a workplace solution that addresses the needs of the business, whilst delivering an experience that is engaging and inspiring for its people.**  
”

**JOE HO**  
Senior Industrial Designer, Steelcase Asia Pacific

# PEOPLE +GROWTH

Organizations thrive when their people are engaged and connected. Yet managing for rapid growth amidst rising real estate costs often forces choices that compromise employee wellbeing.

We designed Navi TeamIsland™ for both people and growth so this paradox could be resolved.

Engineered to deliver better user experiences even in the most compact footprint, Navi TeamIsland allows the workspace to keep up with evolving organization processes and structures, whilst fostering learning and mentoring.

# DESIGN +STORY

Informed by extensive research into workplace needs and behaviors, Navi TeamIsland is based on three core design principles: enhancing employee wellbeing even in high density environments, creating a 'palette of place' within a limited space, and allowing spaces to flex and adapt fluidly as teams and organizations evolve.

Navi Teamisland takes a holistic approach to individual wellbeing, addressing its physical, emotional and cognitive aspects. It also supports the wellbeing of teams, fostering collaboration, democratic interaction, learning and socializing.

# SIT +STAND

We know from research that people like to vary their posture throughout the work day, and this promotes physical wellbeing. Navi Teamisland supports a variety of posture settings so people can sit and stand comfortably, and change from one posture to another seamlessly without interrupting workflow. Navi Teamisland is available in both traditional desk height and HighSit, and comes with a range of planning options to cater to a variety of preferences.

HighSit's carpeted foot platform helps recreate the experience of working at normal desk height. It provides ergonomic support, so the seated position is more familiar and comfortable.

HighSit allows team members to vary their posture between sitting and standing while maintaining eye-level interaction with people around them. The elevated desk height enhances perceived spaciousness, despite the reduction in desk size. The reduced desk dimensions free up room for a collaboration or lounge area, providing a 'palette of space.'

# ONE +MANY

Navi TeamIsland offers a unique trapezoid configuration that can be switched from single to double occupancy to instantly double capacity, making your space more resilient. This configuration also allows team leaders or new members to be easily embedded into teams when closer interaction is called for.

Collaboration spaces at the end-of-runs of the trapezoid create the perfect place for quick discussions or huddles.

# ME+WE

People are at their most productive when the environment not only allows them to focus on individual tasks, but also facilitates meaningful interaction. Eye-level interaction enabled by HighSit makes dyadic collaboration smooth and natural, and democratizes the workplace. The collaborative tops, podiums, and end-of-run leadership spaces built into Navi TeamIsland make it simple and efficient for teams to work together without relocating or interrupting workflow.

Research shows that dyadic collaboration accounts for at least 50% of time spent at the workplace. The dyadic podium creates a convenient perch for impromptu collaboration, and acts as a lightweight boundary and storage space.

End-of-run leadership spaces allow team leaders to be co-located within team spaces, to support learning and mentoring.

Collaborative tops create meaningful adjacencies, fostering interaction and teamwork, and save real estate, as they offer efficient spaces for sharing information that would ordinarily require meeting rooms.

The storage leg, available in traditional desk height as well as HighSit, provides storage space for personal items, creating a sense of permanence and privacy. The top of the leg serves as a convenient 'bag drop.'

# SENSE OF PLACE + SENSE OF SPACE

To humanize the workplace we need to give it a sense of space as well as a sense of place. That's why we've made sure Navi TeamIsland enables personalization, storage and easy access to work tools even within limited real estate.

Navi TeamIsland's flip-up offers easy, seamless access to technology. The friction hinge can be used to dock mobile phones or tablets, while small items can be stored on the back of the door.

# CHOICE+COLOR

Choice is key when it comes to personalizing a workplace, and giving organizations control over their surroundings.

In addition to configuration and height options, Navi TeamIsland comes in a range of leg types that cater to different aesthetic and functional needs. The C-leg is restrained, minimal and architectural in its appeal. The tube leg is friendly and approachable, with the A-leg adding to its style and dynamism. The storage leg allows easy storage of personal items, and its top doubles as a 'bag drop,' affording people privacy and easy access to their belongings.

# TODAY + TOMORROW

We've designed Navi TeamIsland with the future in mind. Its 'base and extension' logic allows for spaces to flex and evolve fluidly as teams and organizations grow and shrink, without compromising employee wellbeing.

Traditional Benching Application (48 people) — 1200mm wide, no personal storage, seated posture only.

**Navi TeamIsland Application (56 people) — 1050mm wide, personal storage added, HighSit options to sit or stand.**

Compared to traditional benching, Navi TeamIsland offers substantially more efficient utilization of space. It accommodates up to 17% more headcount in the same space besides providing for enhanced employee wellbeing through personal touches that humanize density.

**Navi TeamIsland is designed to allow for easy expansion, so organizations can flex and evolve their space as their business grows.**

# PHYSICAL +COGNITIVE +EMOTIONAL

People are the greatest asset of any organization. We've designed Navi TeamIsland to nurture the physical, cognitive and emotional wellbeing of people at work to keep them inspired and engaged even in the most demanding environments.

“  
Offices are more than just real estate, and their effectiveness is about more than just space efficiency. At their best, workplaces have tremendous power to unlock people’s potential.  
”
