

# EIFFEL

by SHIGEKI FUJISHIRO

## DESCRIPTION:

Eiffel stool has been designed in a minimal manner so the structure itself becomes form. It's made out of aluminium so it's stool that can be use both indoors and outdoors.

It's stackable so it can be put away to one side of the room, taking up very little space.

3 legs instead of 4. It's just a matter of ergonomics and comfort. The three legs offer the same stability as a four-legged stool and greater freedom of movement when you're sitting, because legroom is not limited by a chair-leg on each side, as happens with chairs of 4.

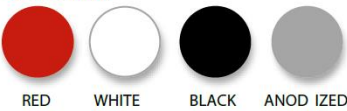

The stool is available in 3 finishes: chrome, anodised, or painted in red, white, yellow, blue, or black, and a small version for kids.

## MATERIALS:

Aluminium.

Polyester paint.

## COLOURS:

## USE:

Indoor and outdoor.

## EVOKE:

Eiffel tower  
Auxiliary stool  
Fun  
Versatile
