

# EIFFEL

by SHIGEKI FUJISHIRO

## DESCRIPTION:

Eiffel stool has been designed in a minimal manner so the structure itself becomes form. It is completely earth friendly, as it is made out of pure pulp and recycled paper. The material is prominent by means of durability, flexibility, weight and insulation. No doubt, its strength will amaze you.

While the Eiffel Tower, which inspired this piece, has four legs, the stool has only three. It's just a matter of ergonomics and comfort. The three legs offer the same stability as a four-legged stool and greater freedom of movement when you're sitting, because legroom is not limited by a chair-leg on each side, as happens with chairs of 4.

The stool is presented in grey colour and comes in an attractive cardboard flat pack. And it includes a recycled cotton bag.

Once at home or in the office it takes less than five minutes to assemble. It's that easy. It's that comfortable.

## MATERIALS:

Recycled paper pulp.

## COLOURS:

## EVOKE:

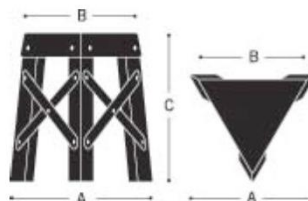

Eiffel tower  
 Auxiliary stool  
 Fun  
 Recycled / Eco-friendly

## LOCATION:

Gift shops  
 Museum shops  
 Kitchen  
 Bath  
 Office

**MEASURES:** 38x38x45 cm

**WEIGHT:** 1,50 kg
