

LJ 2

PET felt Stack Chair

Designer

Laurens van Wieringen

The seat of the LJ series is made out of recycled plastic bottles, the design of the seat brings back many traditional production steps to one smart 3D pressing technique. PET Felt is recycled, recyclable and offers sound dampening properties and great comfort.

Custom colours frame
Any RAL colour

Custom colour blends seat
Green, Dark Green, Olive, Marine,
Pink, Turquoise, Beige, Brown

Ingredients

PET Felt seat

Powder coated steel

HDPE gliders / Felt gliders

PET Technology

PET Felt is made of recycled PET bottles which are turned into a soft, though strong Felt material, which is long lasting, UV stabilized and has great acoustic performance. PET Felt is both recycled as well as recyclable itself.

The design of the LJ Series brings back many traditional production steps to one smart 3D pressing technique.

Bespoke option

Customize every element.

From the seat to the colour on the frame - the options are there to make it blend in or stand out in any context.

Measurements

Seat depth – 42 cm

Weight – 6,5 kg

Carton box – 73 x 60 x 89,5 cm; 0,38 m³

Maximum of four chairs per box

Package weight depends on the amount of chairs

Stackable

Highly customizable

Smart 3D pressing technique

Made of recycled plastic bottles

Recycled and recyclable

Great comfort

Winner of the Interior Innovation Award

DeVorm

We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality.

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

We continuously raise the bar.

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
