## Seam Collection

Designed by Adam Cornish

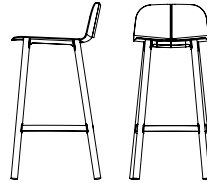

Through a simple series of cuts, folds and joins, Seam is materialised with elegant and precise form. The Seam collection is conceived with a design process not dissimilar to the way in which a piece of fabric is tailored into a form-fitting garment, a refined 'seam' along the spine of the chair making reference to a seam detail used in garment construction. Spanning commercial to residential applications including hospitality, breakout, alfresco and balconies, the Seam collection is designed for outdoor use, though is equally at home indoors.
