

Doweljones

2019 Collections

Dowel Jones over the past 5 years has focused on producing honest pieces with enduring aesthetics through minimal design language and simple gestures. We work with local manufacturers to ensure quality while having flexibility in the designs and finishes of each piece.

Consisting of 4 new collections, our latest releases include a new range of Stools, Side Tables, Coffee Tables, Dining Tables and Pendant Lights, along with the addition of the new Sister Double to the Sister Collection. Photographed in a 19th century grand church hall in Melbourne with long-term collaborator Cricket Saleh, the images show a contrast between bold coloured panels and the original architecture of the building.

All 4 collections were launched at Open For Business, a one-day only event as part of Saturday Indesign in collaboration with Ownworld and Polytec.

We designed the Blossom Pendant to reference the classical spun cone shape, but with a more contemporary reference of an arch. We wanted the pendant to sit somewhere between blending subtly into an environment, whilst also holding it's own as a feature light

Blossom

Blossom is a new pendant light and coffee table that uses a soft, arched base repeated across 6 separate leaf pieces to form a conical shape. Made from Polytec Woodmatt Coastal Oak and Bottega Oak as standard materials, Blossom is available a various Polytec finishes upon request. Blossom can blend effortlessly into open spaces such as restaurants, hotels, work environments and education institutions in soft colour-ways, or stand out in bold contrasting materials.

Material

Polytec Woodmatt Coastal Oak
Polytec Woodmatt Bottega Oak
Available in other Polytec Woodmatt materials

Fitting

E27
Standard 3m Flex Black Braided Cord
Standard Black Canopy

Dimensions

450 X 450 X 400mm

Standard Colours

The Archie Stools we feel has the perfect partnership of a mixed material stool: a scalloped timber seat for softness and comfort, atop a steel frame with subtle curves with a gentle nod to bentwood furniture

Archie

The Archie Stools features a steel frame made up of slightly curved sections, with a softly carved solid timber seat for comfort. Blending strong lines with a thin tubular frame creates a minimal stool with added comfort. Archies strength and functionality will ensure years of everyday use in both high-traffic seating areas and in private environments.

Archie is currently available in low stool (450mm), counter height stool (650mm) and bar height stool (750mm) versions.

Material

American White Oak
Powder coated 19mm Steel

Dimensions

377 X 377 X 450mm
433 X 433 X 650mm
460 X 460 X 750mm

Standard Colours

Rondure was the hardest piece to perfect: balancing the simplicity of a single stemmed pedestal table with the addition of a single element

Rondure

Rondure is the most minimal of the new collections, consisting of 2 circular timber pieces separated by a single stem, with a single sphere gently resting beside it. The sphere can be powder coated to match it's counterpart, or be finished in contrasting colours or in mirrored gold.

Material

Polytec Compact Laminate
Powder coated Steel

Dimensions

500 X 500 X 565mm
800 X 800 X 464mm

Standard Colours

See Polytec website for top and base options

The new Sir Burly Tables felt like the perfect addition to the Sir Burly family, utilising the large diameter tubular pieces on a much larger scale

Sir Burly Tables

The latest customisable table collection from Dowel Jones, the Sir Burly Tables are an extension of our Sir Burly Low and High Stools. Using large diameter tube, the tables feature a single bent section with an overlapping join, meaning the tables can be customised to suit any sized table.

The Sir Burly Tables are available with both solid timber tops, and Polytec compact laminate tops.

Material

Polytec Compact Laminate
American Ash and American White Oak
Powder coated 50.8mm Steel

The Sister Collection embodies our approach to producing minimally embellished yet expressive pieces

Sister Double

Designed by New York based designer Tom Hancocks, Sister features soft, tactile upholstered pieces encapsulated in the brand's signature powder coated steel. Designed for both commercial and residential applications, the Sister pieces are rich, luxurious and inviting, and now available as a 2-seater.

The Sister range currently includes the Sister Chair, Sister Lounge and Sister Double.

Anything But Ordinary.

Dowel Jones was founded by Adam Lynch and Dale Hardiman in 2014 after graduating from university together. Over the past 5 years, founders Adam Lynch and Dale Hardiman have grown the company from a small furniture studio helping to furnish local cafes, to producing furniture, lighting and accessories now found in homes and interiors all across the world.
