New workplace

Seating

- MEETING
- CAFE
- CONFERENCE
- TEACHING SCENARIOS

Cors is a beautifully comfortable stacking and unive

for use in either small groups or within dense conference
and teaching scenarios.

able, high versal chair

The design offers a high level of
an elegant and slim profile,
due to the design and
which is integrated into the back

f flexible comfort from

pattern matrix of the back and the metal structural frame,
work during the moulding process.

Co

To achieve
clear plas
a firmer m

Due to the slim profile design Cors is easy to multi stack, either **within the work area or onto the Cors storage trolley, this makes it quick and** easy to move to other locations.

rs can be used individually or linked using a metal connector on the chair base.

For an additional level of comfort the bottom of the frame has plastic glides which protects the chrome frame and achieves a more secure sit.

Cors

is also available as a fully upholstered chair using an upholstered back cushion that is fixed to the face of the back plastic.

Cors has a fold down writing tablet on a unique mechanism, which provides a secure and firm working surface that can quickly and easily be stowed away.

Cors can be specified
as either an all plastic option with a
choice of five colours or

as a plastic back with a showwood
or upholstered seat.

Cors is part of the Orangebox Smartworking programme which is focused on more collaborative, and shared workplaces.

The traditional needs of teaching and conference have become **increasingly more expansive and demanding.**

‘The flow and sharing of knowledge

between colleagues is critical, we’re looking for a workplace that facilitates this’.

Nobody knows the future.
What we do know is that **adaptability**
is crucial.
