

Cubb Tables

A distinctive range of meeting
and project tables

orangebox

Product Description

The laid-back, informal attitude that helped make the original Cubb range so popular has now been translated into great team tabling, at both work and café height.

With collaborative team tables now central to great Smartworking environments, expanding the popular Cubb range with team tabling was a natural next step. The resulting range of complementary work and café height tables shares the laid-back, informal appeal of the original Cubb range, and also offers the same high level of customization, with a choice of timber stains, metal finishes and work surfaces.

As with the original Cubb range, each and every component of the team tables has been meticulously designed and tested to ensure that it performs its role efficiently and effectively. Tables come with a range of power options, and careful consideration has of course been paid to cable management, which sees cables running seamlessly up the legs and being concealed beneath the work surface.

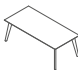

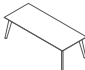

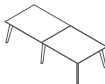

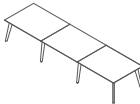

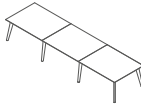

Structurally smart components add to the range's architectural refinement, and can also be exploited by designers to create individual pieces of great character that perfectly match their project criteria.

Top – CUBB-RCP-02 & RCP-03, **Bottom** – CUBB-RD0-02, CUBB-RD0-01, CUBB-SQ0-01 & CUBB-RC0-01.

cubb

rigorously
simple
tabling.

The laid-back, informal attitude that helped make the original Cubb range so popular has now been translated into great team tabling, at both work and café height.

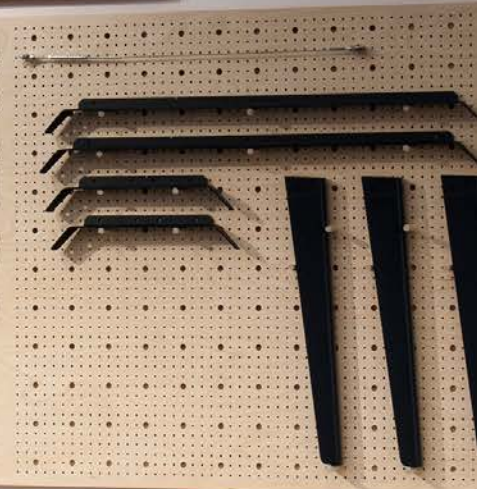

With collaborative team tables now central to great Smartworking[®] environments, expanding the popular Cubb range with team tabling was a natural next step. The resulting range of complementary work and café height tables shares the laid-back, informal appeal of the original Cubb range, and also offers the same high level of customisation, with a choice of timber stains, metal finishes, and work surfaces.

As with the original Cubb range, each and every component of the team tables has been meticulously designed and tested to ensure that it performs its role efficiently and effectively. Tables come with a range of power and lighting options, and careful consideration has of course been paid to cable management, which sees cables running seamlessly up the legs and being concealed beneath the work surface.

Structurally smart components add to the range's architectural refinement, and can also be exploited by designers to create individual pieces of great character that perfectly match their project criteria.

"The design personality of the new range of Cubb seating and tables fits perfectly in its context. We know that this gives Cubb solutions range and substance, and this has now been realised with this extensive range of team tables."

Dr. Stephen J. Legg, Director of Design, Orangebox

Product Specification

Standard Product Description

- Edge Details:** Tapered Edge.

Wooden Legs: Oak legs as standard.

Chassis: Various finishes in Group 1.

Cable Management: Inset through leg.
- Laminate Finishes:**

Various finished in Groups 1 & 2.

Group 1 - High and Low Pressure Laminate options. (HPL) (LPL)

Group 2 - High Pressure and Open Line Laminate options. (HPL) (OLL)

Optional Upcharges

- Wooden Legs:** Oak stained to Walnut, Black or Dark Distressed Oak.

Power: Power options available. Power not available on CUBB-RDO-01, 02, RCO-01, 02.
- Accessories:** Cable clips (set of 4) or Umbilical Cable Riser.

Metal Chassis: Various finished in Groups 2 & 3.
