Oodle® Seating

Oodle Floor

MODEL#: OODLEFLOR

OVERVIEW

The Oodle Floor provides a soft cushion for children to sit on while also having a durable plastic base that will hold up over time. The rocker base provides a 360-degree rocking movement for the children as they sit on the floor. A little movement is found to help students focus on their task.

Pair the Oodle Floor with the original Oodle. The Oodle Floor has the same connection and will fit right on top when rocker base is removed. This will give the student a softer sit, while still featuring the flexible seating movement of Oodle.

MATERIALS

The base is made of polypropylene plastic and available in a platinum finish. The Alphabet vinyl fabric has been tested with 1 million double rub tests. This test represents students sitting and getting up and down over and over. We want to guarantee the fabric will hold up without quickly getting holes from use.
