C4831 | i2i CHAIRS (RE03/WHITE), i2i LOUNGE TABLE (WY).

COLLABORATIVE SEATING

Collaborative work often occurs in areas where people can sit comfortably and connect with one another. These spaces need a chair that lets them stay connected to each other and their information.

i2i seating was designed specifically to foster collaboration. Users can stay more engaged; they can retain eye-to-eye contact and eye-to-information thanks to the unique i2i dual swivel mechanism.

OBSERVATIONS & INSIGHTS

1 / Observation: Collaborative working takes time.

Insight: Chairs should encourage movement and be comfortable for lengthy periods so people remain focused and engaged.

2 / Observation: People don't adjust their chairs while collaborating.

Insight: Adjustments should be automatic and intuitive.

3 / Observation: People change postures when collaborating.

Insight: Chairs should support multiple postures.

C4904

AUTOMATIC COMFORT

i2i accommodates to body movement demands and position shifts. Each time the user moves, the flexing fingers of the back give appropriate support according to the position. With no adjustments, i2i allows users to get comfortable quickly and stay engaged in their work.

C8807

VARIOUS POSTURES

i2i encourages movement and comfort for longer periods. The dual swivel mechanism allows users to stay focused and engaged. The swivel base promotes movement and provides support in a variety of postures.

MULTI PURPOSE SEATING

Increasingly people are working in informal, collaborative settings. Used alone or paired with media:scape, users can share both analog and digital content easily and seamlessly.

i2i is also ideal for welcome areas, in-between spaces and small collaborative areas in open or closed office environments.

SUSTAINABILITY

DESIGNING FOR THE ENVIRONMENT REQUIRES INNOVATIVE THINKING AND SOLUTIONS.

LIFE CYCLE

During our products development process we consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life.

MATERIALS

27% recycled materials, by weight (8% pre-consumer + 19% post-consumer).

Materials chemistry assessment throughout their lifecycle.

100% recycled cardboard and 30% recycled LDPE film in packaging.

PRODUCTION

Made in Sarrebourg (France) by Steelcase.

Uses powder-coat paints: VOC-free and free of heavy metals.

TRANSPORT

Made in Europe, close to customers.

USE

Designed for a long product life, with replaceable parts.

Materials meet stringent health and indoor air quality criteria.

Maintenance information available on steelcase.com

END OF LIFE

84% theoretically recyclable by weight.

100% theoretically recyclable cardboard and LDPE film for packaging.

Quick and easy disassembly.

Plastic parts clearly labelled for easy sorting and effective recycling.

Designed to ensure responsible end of use strategies - refurbishing, charitable donation or recycling.

CERTIFICATIONS

To show continuous improvements, we communicate i2i environmental performance through voluntary environmental labels and declarations. Sustainability related actions and results are communicated in the annual Steelcase Corporate Responsibility report.
