Cord series
Designed by Hertel & Klarhoefer, Germany

Joining forces with Pioneer DJ, the world's leading brand for professional DJ equipment, we have designed an exclusive collection that blurs the lines between the vibrant club scene and the soothing ambiance of home. The Cord DJ consoles are made from solid oak, complimented by the paper cord front that creates a natural and airy expression that flawlessly lets the music flow through. Designed to liberate creativity and inspire music lovers everywhere. Designed to fit the CDJ/DJM 3000 & 2000 series, together with the new revolutionary Opus Quad DJ unit. The cabinet shelves are designed to fit both the Pioneer DJ VM-50 and VM-70 active studio speakers.

Meet the designer
Berlin is often our inspiration. We like it as it is: metropolitan, creative and direct. But as well travelling around, in other countries, seeing things that strike your eyes is where creative ideas are being born... Sometimes the best ideas come in the most unexpected situations! First of all we are inspired by the materiality of things. That's why we work very early on materials and prototypes in scale 1:1. At the beginning of a design project usually there is a conceptual idea that we are trying to realize as soon as possible in models and prototypes. But sometimes some of our design projects have a strong conceptual character that allows them to appear in different ways depending from their materiality
