

Soul series

Designed by Hertel & Klarhoefer, Germany

Soul is the epitome of classic design – the kind of design that just grows more beautiful over time and holds true heirloom potential. With its solid yet detailed construction, Soul exudes an uninhibited elegance. With carefully considered design details, the renowned German design duo Hertel & Klarhoefer has created a modern design classic. The removable seat is made with the finest grain leather, and the sustainable oak frame features perfectly curved armrests for ideal comfort. Inviting you to take a short retreat from it all, the subtle Nordic design ambitions of the Soul armchair make it a perfect fit for every home.

Meet the designer

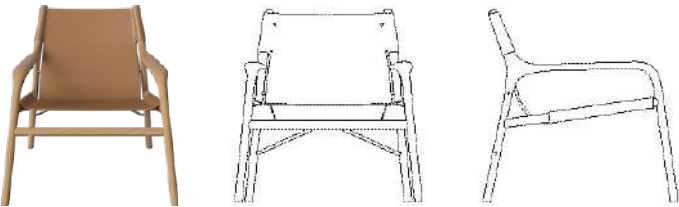

Berlin is often our inspiration. We like it as it is: metropolitan, creative and direct. But as well travelling around, in other countries, seeing things that strike your eyes is where creative ideas are being born... Sometimes the best ideas come in the most unexpected situations! First of all we are inspired by the materiality of things. That's why we work very early on materials and prototypes in scale 1:1. At the beginning of a design project usually there is a conceptual idea that we are trying to realize as soon as possible in models and prototypes. But sometimes some of our design projects have a strong conceptual character that allows them to appear in different ways depending from their materiality
