TECHNICAL INFO

The base and backrest are molded from oak plywood sourced from certified sustainable forestry, used by Viccarbe in the production of these pieces. Both components are webbed and covered with non-deformable expanded polyurethane in varying densities to ensure comfort and durability. The upholstery is available in fabric or leather, depending on preference.

The legs offer options for height adjustment, a caster base, or a swivel base (calibrated steel swivel structure powder coated in thermoreinforced polyester in black).

CERTIFICATES

ANSI BIFMA X6.4:2021 and UNE-EN 16139:2013vc2015
