

Kaio series

Designed by Michael H. Nielsen, Denmark

A tribute to the simple, the honest and the beautiful. The Kaio coffee table is defined by architectural precision and pure minimalist design. Its sculptural frame is crafted from brushed stainless steel and forms the load-bearing core. Asymmetrical legs introduce a subtle sense of movement. With no visible screws, every line remains sharp and clean. The tabletop – available in marble, wood or travertine – adds natural depth and tactile contrast.

Meet the designer

My style is characterized by keeping the focus on the detail and "edge" that separates my designs from the crowd. One of my biggest influences is to register how much diversity there is among people and try to meet the very different needs that it creates. I've always been fascinated by the craftsmanship and the interaction between craftsman and designer. Good design is what gives meaning and value to the people who use it.
